This walk explores some grand views, pleasant cascades, varied bushland and remote areas of Brisbane Waters National Park. From Patonga you will walk up the ridge and take a short side trip to enjoy the wonderful views from Warrah Lookout, before following a series of dirt roads and management trails to Patonga Creek in the heart of the national park. The walk then leads along a mix of trails and tracks mostly passing Mt Wondabyne, a worthwhile side trip, before crossing a few gullies with cool creeks and cascades. Past Myron Brook you will walk back down the waters edge at the remote and unique Wondabyne Train Station.
Broken Bay View

Broken Bay View is an informal, unnamed and unfenced vantage point at the top of the cliffs, east of Patonga. The large rock platform has a number of large Sydney Red Gums, providing some shade. There are great views across the Hawkesbury River, along Cowan Creek and to West Head. The views to the left extend past Lion Island to Barrenjoey Head and out to the Pacific Ocean.

Warrah Lookout

Warrah Lookout is a mostly fenced lookout on a large sandstone platform. The lookout provides fantastic views across the Hawkesbury River. From left to right, you can see along the escarpment which forms the southern boundary of Brisbane Water National Park, out to the Pacific Ocean, Barrenjoey Headland, West Head, along Cowan Creek, Juno Point and along the escarpment to Patonga. This is a great place to spend some time soaking up the views.

Warrah Trig Station

Warrah Trig Station is part of a national geodetic survey established during the 1970’s. The ‘Triangulation station’ (aka trigonometrical or trig station) is a distinct marker once clear of trees, and would have been visible for many kilometers in the area. There are many such trig stations around Australia, which were used to help in surveying. Each station has a known position and altitude, which allows surveyors to use triangulation and determine another point’s location. With advances in technology, these trig stations have been abandoned and superseded. The trig station is now surrounded by trees, with some filtered views along the Hawkesbury River. The area is rich with wildflowers in spring.

Patonga rest area

This small campsite is a signposted rest area, and is about 200m off the Great North Walk, just north of Patonga Drive. The campsite is a small, sandy clearing, with no facilities and no water, but it is sheltered by trees.

Van Dahls rest area

The Van Dahls campsite is unsignposted and sits beside a small intermittent creek that flows over a rock platform. The water should be treated before use, and is not reliable all year round. There are no facilities at the campsite, but is a a very pleasant flat area in a mostly open valley.

Before You walk

Bushwalking is fun and a wonderful way to enjoy our natural places. Sometimes things go bad, with a bit of planning you can increase your chance of having an enjoyable and safer walk. Before setting off on your walk check

1) Weather Forecast (BOM Hunter District)
2) Fire Dangers (Greater Sydney Region)
3) Park Alerts (Brisbane Water National Park)
4) Research the walk to check your party has the skills, fitness and equipment required
5) Agree to stay as a group and not leave anyone to walk solo

Think before you TREK

The 'Think before you TREK' program developed by NSW Police & NPWS promotes the benefits of planning ahead for your bushwalking trip by using an easy to remember acronym:

T Take adequate supplies of food, water, navigation and first aid equipment.
R Register your planned route and tell friends and family when you expect to return.
E Emergency beacon (PLB’s) should be carried on walks with significant gaps in mobile coverage (check terrain profile).
K Keep to your planned route and follow the map and walking trails.

Topo Maps

The maps provided on wildwalks are helpful, but there are times where you may need maps covering a broader area. Maps that cover this walk include:

1:25 000 Map Series:91312S GOSFORD, 91301N BROKEN BAY
1:40 000 Map Series:CMA Ku-ring-gai Chase National Park Tourist Map
1:100 000 Map Series:9131 GOSFORD, 9130 SYDNEY

Grade

This walk has been graded using the AS 2156.1-2001. The overall grade of the walk is determined by the highest classification along the whole track.

Grade 4/6

Hard track

Length
19.5 km One way

Time
7 hrs 30 mins

Quality of track
Rough track, where fallen trees and other obstacles are likely (4/6)

Signs
Minimal directional signs (4/6)

Experience Required
Some bushwalking experience recommended (3/6)

Weather
Storms may impact on navigation and safety (3/6)

Infrastructure
Limited facilities (such as cliffs not fenced, significant creeks not bridged) (4/6)
1.12 | Broken Bay View

(700 m 15 mins) Veer left: From the Broken Bay view, this walk follows Great North Walk arrows uphill along the track. The track winds gently through the bush, with the occasional water glimpse to the right. After a short time, the track comes to a clear intersection with the Pearl Beach / Patonga fire trail with a sign pointing back to Patonga.

Veer right: From the intersection, this walk follows the Great North Walk arrow downhill along the wide management trail. After about 250m, the trail passes a track on the right (marked with 5 large boulders - this informal track leads to another fenced management trail). The walk continues along the management trail for another 100m and comes to an intersection near the Warrah Lookout, and a sign pointing back to 'Patonga'.

1.82 | Optional sidetrip to Warrah Lookout

(70 m 2 mins) Turn right: From the intersection, this walk heads between the timber posts and follows the 'Warrah Lookout' sign along the sandstone footpath. The path leads through the bush for a short distance, coming to the fenced Warrah Lookout on the left. The path follows an informal side tracks that lead to unfenced sections of cliffs.) At the end of this side trip, retrace your steps back to the main walk then Continue straight.

1.82 | Warrah Lookout

Warrah Lookout is a mostly fenced lookout on a large sandstone platform. The lookout provides fantastic views across the Hawkesbury River. From the stairs, you can see along the escarpment which forms the southern wall of the Hawkesbury River National Park, out to the Pacific Ocean, Barrenjoey Headland, West Head, along Cowan Creek, Juno Point and along the escarpment to Patonga. This is a great place to spend some time soaking up the views.

2.16 | Warrah Car Park

(1.2 km 22 mins) Continue straight: From Warrah car park, this walk follows the sandstone steps and footpath downhill the road towards the dirt road. The path soon passes a plaque and a sign pointing back along the 'Tony Doyle Track' and comes to the Warrah car park.

3.18 | Int of Hawkesbury track and Sani Depot Trail

(1.3 km 24 mins) Continue left: From the intersection, this walk follows the 'Great North Walk' sign around the locked gate to follow the management trail away from the road. After about 100m, this walk comes to a clear three-way intersection marked with signs pointing back to 'Patonga'.

3.68 | Int of Rest Area and Girrakool tracks

(590 m 21 mins) Continue right: From the intersection, this walk follows the Patonga Drive trail and comes to an intersection with a sign gently downhill along the management trail. After about 150m to come to the sealed Patonga Drive. Here the walk follows the GWNL arrow post across the road to a locked gate and management trail, marked with a 'Great North Walk' sign.

3.81 | Optional sidetrip to Rest Area

(210 m 5 mins) Veer left: From the intersection, this walk follows the 'Rest Area' sign gently downhill along the management trail. After about 200m, this trail leads to a small camping area at an intersection (and a turning circle on your right). At the end of this side trip, retrace your steps back to the main walk then Turn left.

3.81 | Patonga rest area

This small campsite is a signposted rest area, and is about 200m off the Great North Walk, just north of Patonga Drive. The campsite is a small, sandy clearing, with no facilities and no water, but it is sheltered by trees.

3.81 | Int of Rest Area and Girrakool tracks

(550 m 9 mins) Veer right: From the intersection, this walk follows the 'Girrakool' sign gently uphill along the wide trail. After about 200m, the trail branches left, then leads gently down for another 100m, coming to an intersection where the main trail bends right (and with the narrower Patonga Creek trail ahead), marked with a GWNL arrow post. Turn right: From the intersection, this walk follows the GWNL arrow post north along the wide sandy management trail. The trail leads along the heath and large scrubby gums for about 250m to come to T-intersection with another wide trail, marked with a 'Girrakool' sign pointing back up the trail.

4.36 | Int of Hawkesbury track and Patonga Dr trail

(1.3 km 24 mins) Turn left: From the intersection, this walk follows the 'Girrakool' sign downhill along the management trail. After the next 200m, the trail gently bends right then comes to an intersection (just before a large open rock platform), marked with a 'Girrakool' sign (pointing right). Turn right: From the intersection, this walk follows the 'Girrakool' sign east uphill along the management trail. The trail leads up the hill for about 25m to come to a short rock platform where the trail continues fairly steeply uphill. The trail bends left and then winds gently around the side of the hill, enjoying some views along the way. The trail undulates for a while before leading gently down to pass a large clearing (on your left). Just past this clearing, the trail heads down (fairly steeply at first) for about 200m to enter a wooded forest and come to a clear three-way intersection, marked with a 'Sani Depot Trail' sign (on your right).

5.67 | Int of Hawkesbury track and Sani Depot Trail

(750 m 13 mins) Continue straight: From the intersection, this walk follows the GWNL arrow post downhill along the wide trail. The trail soon leads the
tall Sydney Redgums to lead down for almost 600m. The walk crosses a
culverted creek (with sandstone blocks) and then the trail mostly flattens out. 
Here the trail continues for another 170m leaving the tall forest to walk through 
the open heath, passing near a small cliff (on your right), to come to 
an intersection with the faint track (on your left), this is just before 
the main trail bends right and starts to lead downhill again. 

4.61 | Optional sidetrip to Van Dahls rest area
(160 m 3 mins) Turn left: From the intersection, this trail follows 
the narrow, faint track south-west over a small water bar, then 
gently downhill. The walk continue down towards the valley for about 120m to come 
to a small clearing, the Van Dahls campsite. This clearing is just before a small 
ephemeral creek which flows over a sandstone platform. At the end of 
this side trip, retrac your steps back to the main walk then Turn left. 

4.61 | Van Dahls rest area
The Van Dahls campsite is unsignposted and sits beside a small intermittent 
creek that flows over a rock platform. The water should be treated before use, 
and is not reliable all year round. There are no facilities at the campsite, but is 
a a very pleasant flat area in a mostly open valley. 

4.61 | Int of Hawkesbury track and Van Dahls rest area tr 
(590 m 12 mins) Continue straight: From the intersection, this walk follows 
the wide trail downhill, keeping the valley to your left. The trail winds downhill 
for almost 600m, crossing a couple of culverted creeks, until, just 
before bending left, this walk comes to a notable rock platform (with 
a ephemeral creek) and filtered view down the valley (to your left). 

7 | Rock Platform
(520 m 12 mins) Continue straight: From the rock platform, this walk follows 
the trail north up the side of the hill. The trail leads uphill for about 25m 
before bending left and leading downhill for about 80m, where the trail winds 
through a ferny valley with a scattering of cabbage palms (Livistona australis). Here there is a fairly steep climb up 200m, then the trail 
gently downhill for just over 200m more, to come to a Y-intersection with 
the signposted ‘Great North Walk’ (on your left). (The trail ahead soon leads 
over Patonga Creek to the locked back gate of Woy Woy Landfill). 

7.52 | Int of Hawkesbury track near Patonga Creek 
(440 m 13 mins) Turn left: From the intersection, the walk follows the ‘Great 
North Walk’ sign downhill along the track. After just shy of 100m, the track 
crosses a long, low ridge on the southern side of the valley, passing near 
a small cliff (on your right). Here the trail steeply crosses this creek, the track begins to head quite steeply uphill for about 
100m, passing a faint side track before climbing up some carved steps in the 
rock beside a sloped rock platform (on your left). The track continues steeply 
up for another 40m, where the track bends right (at the GNW arrow post). 
Soon after crossing this creek, the track begins to head quite steeply uphill for another 
100m, passing a faint side track before climbing up some carved steps in the 
rock beside a sloped rock platform (on your left). The track continues steeply 
up for another 40m, where the track bends right (at the GNW arrow post). 

11.29 | Int of GNW and Mt Wondabyne Peak tracks
(950 m 21 mins) Continue straight: From the intersection, this walk follows the 
GNW arrow post west (in the opposite direction to the ‘Patonga’ sign). After 
about 100m, the track steeply climbs up some carved steps in the 
towards another large rock platform with a wide

11.2 | Mt Wondabyne Campsite
This basic campsite is found at the end of a management trail, near the base 
of Mt Wondabyne. The campsite is at the bottom of a small (east facing) rock 
wall and has trees surrounding much of the area, providing some shelter. 
There is an established fire circle and a basic seat. There is no water or other 
facilities. (There is also small cave suitable for sleeping a few people about 

11.29 | Optional sidetrip to Mt Wondabyne Peak
(210 m 5 mins) Turn right: From this intersection, the walk follows the Mt 
Wondabyne peak track north-east as it heads uphill directly towards Mt 
Wondabyne. The trail is leads gently at first then starts to climb up a series 
of rock ledges. After about 60m, the track passes a small cave (large enough 
for about 2-3 people to camp inside). Here there is a sign allowing a short climb up the 
rocky track then for through a grove of small trees, to come to the first peak. 
The faint trail continues across the ridge for another 60m then comes to the 
main peak, where there is an old trig station and great panoramic views. 
At the end of this side track, retrac your steps back to the main walk then 
Turn right. 

11.29 | Mt Wondabyne
Mountain walk is one of the most prominent peaks in Brisbane Water National Park. The long cone-shaped hill has a rocky top and is home to a 
trig station. Walkers can enjoy full 360-degree panoramic views from the top. 

To the east are good views over the Brisbane Water, Woy Woy and other central coast suburbs. West, down next to Mutle Creek, you can see some 
buildings near Wondabyne Station and the train line. Otherwise, most of 
the expansive views are over much of Brisbane Water National Park. There are 
some small trees providing limited shade, a great place to soak up the views. 

13.28 | Int of GNW and Thomass Loop track 
(1.5 km 28 mins) Veer left: From the intersection, this walk follows the ‘Girrakool’ sign, 
heading under the power lines and down the track to soon cross a small 
ephemeral creek. From the creek, the walk follows a rock platform for about 
200m to then head over a section of timber boardwalk and past a few disused 
bonded warehouses. The track then passes over some carved steps in the 
onto a notably large rock platform with a wide 

13.47 | Int of the GNW and Patonga service trail 
(690 m 24 mins) Veer left: From the intersection, this walk follows the 
‘Girrakool’ sign gently down along the narrower track. The track leads down 
for about 60m to pass over a rock outcrop and then 80m later, comes to 
a clearing that has been used as a campsite (on your left). From the clearing, 
the track continues down the hill for about 150m, stepping down the rocks 
and along some small side tracks before reaching the top of the ridge. Here the 
track becomes quite steep in places and winds down some rock walls 
and among the grass trees for about 300m, where the track bends sharp right 
at the bottom of some steps in a cliff in the rock. The track continues 
for another 100m to follow the steps down the sandstone overhang, 
here the track bends left then right to wind down and cross the creek (that is 

14.5 | Kariong Brook Falls
This tranquil spot of the Great North Walk is home to some lovely falls and a
water hole. The eastern side of the creek has a tall sandstone cave and wall. After rain these falls can become very spectacular, other times is a cool place to rest. A great spot to stop for a snack.

15.45 | Kariong Brook crossing
(400 m 11 mins) Continue straight: From the Kariong Brook, this walk follows the track north-west away from the cliffs (initially keeping the waterfall to your right). The track initially leads fairly steeply out of the densely forested valley then leads more gently uphill for about 100m to pass alongside a long rock wall (on your right). From the end of the rock wall, the track starts to lead downhill for about 200m, to then head down the embankment and steps and cross Myron Brook on the sandstone rock platform, to the western bank.

15.86 | Myron Brook crossing
(1.6 km 36 mins) Continue straight: From Myron Brook, this walk follows the rocky track west up the steep hill. After about 400m of steep climbing, the track mostly flattens out to head up through the cleft in a rock and onto a flat rock platform. Here the track continues more gently uphill, crossing more rock platforms for just over 1km, through the heath and scribbly gums, before bending left around a rocky outcrop to come to a T-intersection with a wide management trail. There is large sign here, pointing back down to 'Patonga'.

17.42 | Int of GNW and Wondabyne Station tracks
(6.30 m 11 mins) Turn left: From the intersection, this walk follows the 'Wondabyne Station' sign downhill along the management trail. The trail gently undulates along the top of the ridge for about 600m to come to an intersection with the Pindar Cave track (leading over a rock platform, on your right), marked with a GNW arrow post (on your left).

18.05 | Eastern end of the Pindar Cave Track
(1 km 19 mins) Continue straight: From the intersection, this walk follows the GNW arrow post south, gently down along the wide management trail. The trail soon bends right and leads quite steeply down before mostly flattening out again. From here, the trail leads gently downhill for about 600m until the trail bends left and leads quite steeply down for just shy of 250m to come to a clearing at the end of this management trail, marked with a 'Brisbane Water National Park' sign.

19.08 | Clearing above Wondabyne Station
(440 m 13 mins) Continue straight: From the clearing, this walk follows the GNW arrow post south, down along the track to head down some carved steps through a cleft in a rock. The track winds steeply down the series of rock steps for about 150m to pass a filtered view (left) of the cranes, down at the old Gosford Quarry. The track continues to wind down, a little less steeply, for just over 200m to then climb down a timber staircase (which starts with a metal landing at the top). From the bottom, the walk continues down towards the train line, soon bending left to pass a large boulder and strangler fig tree and come to the north-bound platform of Wondabyne Train Station.

19.52 | Wondabyne
Wondabyne is situated in Brisbane Waters National Park on the banks of Mullet River, which feeds into the Hawkesbury River north of Brooklyn. The area is defined by the National Park's flora and fauna, the quarry, railway station and a few houses sitting above the water around the river. The quarry produced sandstone building materials, used in the construction of the National War Memorial in Canberra. More recently, in 2000, the quarry was re-opened for restoration of St Mary's Cathedral spire in Sydney. Wondabyne Station, named after the nearby Mt Wondabyne, was built in 1889 and exclusively used for the quarry - it was then known as Mullet Creek Station.

The station is one of the smallest on the line and one of very few railway stations in a NSW National Park. When you catch the train to Wondabyne, let the guard know you want to get off at Wondabyne Station, otherwise the train will not stop. Travel in the last carriage as the platform is very short. To catch the train from Wondabyne, wave to the driver.
