

Kanning Cave Walk

20 mins

Easy track

922 m Return

▲ 34m

2

This short walk follows a clear track to a large sandstone cave on the Kanning Walk. From the Honeman's Picnic Area, follow Kanning Walk through the bush and along the side of a long rock wall. There are several caves along the way, the main one being quiet large and tucked behind some large boulders. The cave provides a cool spot on hot days. After admiring the cave, walk back the same way, passing some large angophora trees.

Are you ready to have fun?

Please ensure you and your group are well prepared and equipped for all possible hazards and delays. Check park closures, weather information and Fire Danger Rating before setting out. Optional side trips and alternate routes noted are not included in this walks overall grade, length or time estimate. Please allow extra time for resting and exploring areas of interest. The authors, staff and owners of wildwalks take care in preparing this information but will not accept responsibility for any inconvenience, loss or injury you may experience. Please take care, have fun - Happy Walking.

Getting there Traveling by car is the only practical way to get to Mudbrick building car park (gps: -33.4591, 151.3918). Car: There is free parking available.

This is a return, so you will finish back at the start.

Find up to date and more information including; travel directions, weather, park closures and walker feedback at <http://wild.tl/kcw>

0 | Honeman's Rock picnic area

Honeman's Rock picnic area is a large picnic area at the top end of Island View Drive. This picnic area has a couple of large grassy areas, composting toilets, free electric BBQs, picnic tables, shelters, garbage bins, drinking water and information signs. The picnic area is home to a mud brick building (available for hire) and Honeman's Rock, from which the area derives its name. There is a fair amount of parking available next the picnic area, and some extra spaces a few hundred meters down the road.

0 | Honeman's Rock

Honeman's Rock (aka Honeyman's Rock) is a large rock outcrop in front of the mud brick building, in the Honeman's Rock Picnic area. The exposed section of rock is 60m long and about 30m wide, with the western side having a significant unfenced drop. The rock is named after Cecil Lyle Honeman who became a lease holder on the mountain in 1962. The rock has a large depression that once filled with water, and a drain has been dug to keep the pool empty and clear of rubbish.

0 | Mud Brick Building

The mud brick building is a landmark in the main picnic area at Kincumber Mountain, and is a popular spot to gather. Also known as 'Kincumber Mountain Information Centre', 'The Kiosk', 'Kincumber Kiosk' and 'Kincumber Mountain Kiosk', the building was constructed in 1986 with funding from Community Employment Programme. The building is generally locked but can be booked through the local Lions

Club for special events. The building has a rain water tank, small kitchen and one main large room. The verandah also provides good shelter.

0 | Mudbrick building car park

(90 m 1 mins) From the car park, this walk heads up the road, initially keeping the mud brick building to the left. Soon the road leads to an intersection (next to an information board and fence on the left).

Turn right: From the intersection, this walk follows the 'One Way' road sign away from the picnic area and along the road. Almost immediately, there is a locked gate and the 'Kanning Walk' sign (on the left).

0.09 | Kanning Walk gate

(370 m 7 mins) Turn left: From the road, this walk follows the 'Kanning Walk cave 300 metres' sign around the locked gate and along the old sandy management trail. After about 120m the walk turns right, following another 'Kanning Walk' sign, and passes between two large, exposed tree root systems. Soon after this, the track is concrete for a short distance and passes along the base of a long rock wall. The walk goes down some steel stairs and across a timber bridge, coming to a sandstone overhang cave. This cave is quite large and has a 'cave 100m' sign, pointing further along the track. Follow this sign for about 150m, passing over a steel platform, up a small rise and down some steel stairs. From the base of these stairs, the walk continues for about 25m along the flat track to find the unsignposted entrance to the cave. The entrance is between two large boulders on the left.

0.46 | Kanning Walk Cave

The main cave on Kanning Walk is surprising large for a sandstone environment. The cave has two main sections. There is a large cabin about 7m wide and 9m deep. A small tunnel extends about 10m further to a small chamber at the back. The entrance to the cave is behind two large boulders, providing extra shelter. It is believed that A. A. Glasson lived in the cave in the early 1930's, which was not uncommon during the depression. The cave has proved to be a great place to rest on hot days.
